CONFIDENTIAL

9/19/71

Dear Jim,

I now have in my possession negatives of some fairly clear and some unclear pictures plus some I had obtained earlier. I will be having these negatives printed soon.

If you know a good pathologist who might care to study them in consultation with me, on a basis of confidence, maybe it might be a good idea.

As often happens, the more one studies old things, the more one sees the new.

Best,
